THE SCANDINAVIAN COUNTRIES IN WORLD TRADE

1940

Introduction.

The following tables are taken from the trade statistics of Denmark, Finland, Norway and Sweden, as well as of Canada. They are designed to give a summary description of the extent of the Scandinavian participation in world trade, the commodities in which its commerce is concentrated, and the principal countries with which it deals.

Altogether these four countries accounted for almost \$1,200,000,000 worth of exports during the calendar year 1938, which is 5 per cent of the world total, and 11 per cent of the total for Europe. Very many of their export products are important exports of Canada, including newsprint, woodpulp, lumber, butter, cheese, bacon, beef. In the aggregate their exports are about 50 per cent higher than those of Canada, and in certain commodities in which they specialize are double Canada's.

In 1938 Sweden was the eleventh country in the world in the value of its imports, and twelfth in exports. Denmark was exceeded only by New Zealand in exports per capita, and was fourth in imports per capita. Norway was second in the world in imports per capita but ninth in exports. Finland was slightly below Norway in exports, and thirtieth country in the world in absolute value of imports.

The tables of this release are all expressed in Canadian dollars. With the exception of Table 8, which gives Canadian statistics, they were extracted from the Scandinavian trade reports. The following rates were used for conversion of currencies:-
